SKILLS

- C#, .NET, ASP.NET Core, Blazor WebAssembly, Entity Framework Core, SQL Server, REST APIs, Web API, Web Services, OData, JSON, API Integration, Razor Components, LINQ, Application Development, Design Patterns
- Object-Oriented Programming (OOP), SOLID Principles, Microservices, Azure Cloud, Azure DevOps, Git, Version Control, Docker, IIS, Telerik UI, Microsoft Fabric, PostgreSQL, Production Support, Code Reviews
- Agile/Scrum, Cross-Functional Collaboration, Requirements Analysis, Deployment & Release Management
- Debugging, Troubleshooting, HTML, CSS, SDLC, Technical Documentation, Relational Databases

WORK EXPERIENCE

VSolvit: *Backend .NET Software Engineer II*

06/2026 – Present

- Develop enterprise backend microservices and REST API integrations using C#, .NET, and SQL, implementing business logic, validation, and data access for production applications.
- Translate software requirements, database dependencies, API integrations, and business rules into backend functionality that meets defined acceptance criteria.
- Resolve production defects through Visual Studio debugging, application tracing, and database analysis, validating fixes with integration testing before release.

VSolvit: *Full Stack .NET Software Engineer II*

04/2025 – 06/2026

- Developed end-to-end .NET features using C#, Blazor, REST APIs, and SQL, integrating frontend workflows with backend business logic and database operations.
- Led application deployment efforts through cross-functional collaboration with development teams and internal stakeholders to schedule maintenance windows and production downtime for software releases.
- Communicated release plans, deployment status, and maintenance impacts with project managers, focus area leads, and supervisors while leading IIS application deployments and release procedures.

VSolvit: *Full Stack .NET Software Engineer I*

08/2024 – 04/2025

- Developed full-stack applications using C#, ASP.NET Core, Blazor WebAssembly, Entity Framework Core, and SQL Server, supporting database-backed workflows across frontend and backend systems.
- Supported application releases through cross-functional collaboration with development teams and internal stakeholders to prepare deployments and coordinate required maintenance windows.
- Developed an AI-powered HR application using OpenAI APIs, embeddings, Pinecone, and Retrieval-Augmented Generation, reducing employee inquiries to Human Resources by **32%**.

Bosch Automotive Service Solutions: *Software Engineer Intern*

02/2023 – 02/2024

- Developed a greenfield C# WebAssembly help desk application supporting ticket intake, triage, routing, and escalation workflows.
- Created Swagger/OpenAPI references, troubleshooting documentation, and development guidelines for application development and support.
- Translated ticket-routing and operational requirements into maintainable C# functionality through cross-functional collaboration with senior developers, data engineers, and system architects.

EDUCATION

- Master of Science, Software Engineering - Western Governors University, Salt Lake City, UT | Feb 2024 - Feb 2026
- Bachelor of Science, Software Engineering - Western Governors University, Salt Lake City, UT | Feb 2022 - Feb 2024
- CompTIA Security+ | Feb 2026 | SAFe® Agilist (SA) | Scaled Agile, Inc. | July 2026
